Kelly,

I just found out late Friday that I may have to testify in a court case for the state. The case is to be heard March 9 – 11 in Muscatine so I need to block out those days in case I am needed. Could we change the date of hearing to March 17? If not, let me know of another possible date from the following list: March 12, 17, 18, 19.

Sorry about having to change it.

Chris

Subject: public comment period

Hi Kelly,

I am working on getting everything ready for the public comment period. In order to do that I need to make arrangements with you for date to have a public hearing to take comments on the draft permits. I would like to have the public hearing on one of the following dates: March 9, 10, 11, or 12. Due to the number of people that could show up we plan on splitting up the meeting into two (2) 2-hr segments. We would run the first one from 3 – 5 pm and the second would be from 7 – 9 pm. This would allow everyone a chance to show up at a time convenient for their own schedule.

So I need the following information from you:

- The date that you would like to have the meeting at the Meskwaki Tribe
- The location the meeting will be held (physical address)
- Where the files from the project will be available (physical address) when I send them to you?

Please let me know if you have any questions,
Chris

Hi Kelly,

The permitting process is getting closer to a public comment period. I have been working the last several weeks on drafting permits and responding to IPL comments on the current draft permits. In addition I have been preparing all documents for a public comment period.

Most likely the public comment period will start the 1st week of February. I will be getting in touch with you by the end of next week to figure out a good date towards the end of February/first week of March to have the public hearing at the Meskwaki Tribe. Prior to the public comment period starting I will be sending you a copy of the permits, the fact sheet, the public notice, and a disc that contains all of the application materials.

Hello Chris,
I am touching bases with you in regards to the Sutherland Coal Plant, in Marshall Town. I have not heard back from you in a while and would like to know where things are standing in regards to the plant and its construction and permitting process. As I have been reading more and more in the local paper I would like to see where it truly stands with the Iowa Department of Natural Resources.
Thank you

Hi Kelly,

We are not to the point of sending everything out for public comment at this point. I am still working on drafting permits. Once I have a better idea when the public comment period will start I will give you a heads up on when you might expect to see the materials. Also, since it is such a large volume of paper we are looking at scanning everything to a disc so we can send out a disc with all of the documents to try and save paper. We are also looking at putting all of the documents on our website too.

Let me know if you have any questions in the meantime.
Chris

Hello Chris,
I am touching bases in regards to the materials concerning the Coal Plant Permitting. I have not heard back, nor received any information or papers/information. If can let me know the status it would be wonderful, Thank you

Kelly,

Catharine asked me to get in touch with you as she stated we are going to make all of the documentation from the IPL project available at the Meskwaki tribe when we get to the public comment period. In order to do that I will need to know where you will be keeping the documentation. In other words, what address should I list in the public notice so people know where to go to see the application materials. The file will also be available at the Marshalltown library and here at the DNR.

I am not sure when the public comment period will start at this point as we are still waiting for information from IPL so it is not a rush on having an address at this point.

Let me know if you have any questions,
Chris

Chris,
No you are fine; please send what materials are needed to our office at
Meskwaki Natural Resources
1826 340th St.
Tama, Iowa 52339

My concern was if it was a few pieces of paper then we could use the Tribal Center, but due to the amount I would prefer that we utilize our office.

Thank you

There is a lot of information in the file. However, if you don't want everything due to space I can limit it to the draft permits, fact sheet, and the application w/ correspondence. That would cut the information down to about 2 boxes. There is probably another 3 boxes of correspondence with the file (i.e. information submitted by citizens, information from the Utilities Board, newspaper articles etc.). Everything will be available at the Marshalltown library and at the Air Quality Bureau so if someone wanted to see the other boxes they might have to travel to Marshalltown, but at least the most important information would be at your location.

Let me know how you want to handle it. We are probably at least a month away from going to public comment as I just received additional information from IPL and have yet to review it.

Subject: RE: Permits

Kelly,

The Department just received updated information from IPL concerning the Marshalltown plant last week. We are in the process of reviewing it. Representatives of the Air Quality Bureau are planning on going to Marshalltown for an informational meeting on the plant sometime between May 5 – 7. I know that Catharine has stated that we would also have a separate informational meeting for you. I was wondering if one of those dates (May 5 – 7) would work for you. My supervisor is on vacation and has other commitments later in the month.

I will give you a call later today to find out if any of those dates work and what the format would be.

Subject: PSD Application for IPL Sutherland Generating Station

Ms. Schott,

Catharine Fitzsimmons and Chris Roling asked me to send you an electronic copy of the Prevention of Significant Deterioration (PSD) application for IPL's Sutherland Generating Station Unit 4 in Marshalltown, Iowa. The file is fairly large (> 30 MB) so I can only send it via DNR's FTP site.

To download the file from DNR's FTP site, open your internet browser and go to:

<ftp://ftp.igsb.uiowa.edu/pub/Upload/JMarcel/>

You should see a PDF file named <64-01-012 unit 4 sutherland generation station.pdf>. If you double-click or right-click on this file you should be able to download it to your computer.

Let me know if you have any problems opening the file.
